

CASE STUDY | CONFIDENTIAL CLIENT

## **ON-SITE COVID-19 SCREENING FOR OFFSHORE NATURAL OIL & GAS PLATFORMS**

### **CHALLENGE**

The COVID-19 global pandemic has created an urgent need for emergency response services across the world, including our offshore oil operator clients.

In response to COVID-19, Witt O'Brien's is providing services related to on-site health care screening by medical personnel for a large, independent Oil & Natural Gas company operating offshore platforms. As is the trend with many companies facing this crisis, our client wishes to ensure the health and safety of their employees while focusing internal resources on their continuity of operations.

### **SOLUTION**

Witt O'Brien's is providing the appropriate resources seven days a week to screen the platform crews rotating on and off shift for COVID-19 symptoms, pursuant to the Center for Disease Control's (CDC) and client's guidance. Our firm, in conjunction with the EMT's, are providing documentation and reporting, as well as ease of mind, that client personnel are following screening and reporting protocols.

### **RESILIENCE DELIVERED**

Maintaining a safe working environment for critical infrastructure operators is fundamental to building resiliency. Witt O'Brien's is supporting these efforts by working within our client's workforce to screen personnel for COVID-19 symptoms prior to their deployment into the field. Successful delivery of these services effectively reduces the likelihood of an employee or contractor inadvertently initiating the spread of COVID-19 into the offshore platform and supporting logistics environments.

Ensuring the availability of essential personnel and resources is critical to the operational resiliency of our Nation's critical infrastructure assets, and Witt O'Brien's is proud to support these efforts by helping our clients mitigate the risk to lives and livelihoods posed by COVID-19.

### **WITH YOU WHEN IT COUNTS**

**Our rapid deployment and deep experience accelerate your response. Our experienced team oversees careful and compliant cleanup operations that support the welfare of your communities.**
